Industry workers, VET, HR and policy makers

MAIN RESULTS

Training Programme & Toolkit

OUR CONSORTIUM

LEARNING BRAINS in action

PROJECT KICK-OFF MEETING IN BILBAO LAUNCHES THE LEARNING BRAINS EUROPEAN COLLABORATION.

The city of Bilbao recently hosted the Kick-off Meeting of the Erasmus+ project Learning BRAINS – Integrated On-the-job Learning Systems for Industrial Reskilling, officially marking the beginning of an exciting two-year European collaboration focused on innovation, AI-based learning and industrial reskilling. The meeting brought together representatives from all partner organisations involved in the consortium, combining both onsite and online participation in a dynamic and collaborative atmosphere. AI-POWERED LEARNING: HOW ARTIFICIAL INTELLIGENCE IS TRANSFORMING INDUSTRIAL TRAINING

AI-driven learning tools boost knowledge transfer, efficiency, and innovation across the industrial sector.

As industries face ever-faster technological change, continuous learning has become a critical element of competitiveness. Employees must constantly adapt to new machines, processes, and digital workflows. Traditional training models, however, often fall short—they are time-consuming, costly, and rarely customized to individual needs. Artificial intelligence (AI) is reshaping this landscape by enabling a new era of dynamic and individualized learning in the workplace. [Learn more](#)
